UNIVERSITY

ODD ONE OUT

ODD ONE OUT: Classification means to define groups of people or things, arrange by class or category and then find out different things or odd one out.

In this part out of a group, one people or things differ from remaining other words, they are having some common properties. They may like as a international, national level information history, science, alphabet and numerical analogy, Classification having 3 types which are below :

- (a) Classify among words and people (TYPE-1)
- (b) Classify among pair of word (TYPE-2)
- (c) Odd one out among set. (TYPE-3)

ODD ONE OUT

TYPE – 1 :

In this type, among four options three objects or things having same properties.

Example -

- (a) Lawyer
- (b) Legislator
- (c) Mayor
- (d) Governor

Sol. Last 3 options are related to the politics, and first option does not follow. So, Lawyer is the odd one.

ODD ONE OUT

Type – 2 :

In previous type, there is a single word or thing is given which follow same type of properties. In this type we have a pair in it, 1st object related to another object with any specific properties, we have found that pair which doesn't follow it.

Example -

- (a) Painter : Gallery
- (b) Actor : Stage
- (c) Worker : Factory
- (d) Student : Stage

Sol. Clearly, (d) is the odd one. In all other pairs, 2nd is the working place of the first.

ODD ONE OUT

Type – 3 :

In this type, pairs are given with minimum 3 digit or object which are correlated to each other with any specific property

Example -

- (a) (3, 9, 27)
- (b) (5, 25, 125)
- (c) (6, 36, 216)
- (d) (9, 81, 728)

Sol. Clearly, (d) is the odd one, which does not follow continue powers of 9.
